

Resolution Number: 3

Submitted by: The Honorable Mayor Martin J. Walsh, City of Boston

**RESOLUTION IN SUPPORT OF DIRECT FEDERAL FUNDING TO CITIES TO PROVIDE SUBSTANCE USE DISORDER PREVENTION, TREATMENT, AND RECOVERY SERVICES**

**WHEREAS**, America's substance use epidemic continues to grow; and

**WHEREAS**, an estimated 21 million Americans suffer from addiction to drugs and alcohol; and

**WHEREAS**, an estimated 60,000 Americans died from overdose in 2017, with large increases due to fentanyl and other powerful opioids; and

**WHEREAS**, the current epidemic is placing tremendous strain on local government resources who are on the front line of combating this crisis; and

**WHEREAS**, in Fiscal Years 2017 and 2018 Congress appropriated increased funding to support state efforts to combat the opioid epidemic via the 21st Century Cures Act and the Comprehensive Addiction Recovery Act (CARA); and

**WHEREAS**, Congress appropriated another \$1 billion in the FY 2018 omnibus appropriations bill that will go to states under the CURES Act; and

**WHEREAS**, local governments across the country have developed and implemented policies and programs to address substance use disorder and support long-term recovery; and

**WHEREAS**, local governments are well positioned to be able to rapidly expand and improve these programs with additional federal funding, providing resources and services to where they are needed most within their communities; and

**WHEREAS**, Congress and SAMHSA should explore options to get additional funding directly to local governments through changes in eligibility requirements of existing programs and/or creating dedicating funding for local governments to combat substance use disorders and reduce overdose deaths,

**NOW THEREFORE BE IT RESOLVED**, that the United States Conference of Mayors calls on Congress to work with local governments to create new funding opportunities through existing or new programs that will allow the nation as a whole to more effectively address the current substance use crisis, help more people find recovery, and save more lives.
