INVESCO STILLINGS ST WALL
FEBRUARY 18, 2021

WAVE REVISIONS -

The previously approved wave concept showed waves spanning the open areas of the upper levels of the parking garage and waves mounted to the face of the building on street level.

This new concept shows the waves mounted only to the face of the building, with fasteners in the mortar of the brick. The previous design required more modification to the building than feasible.

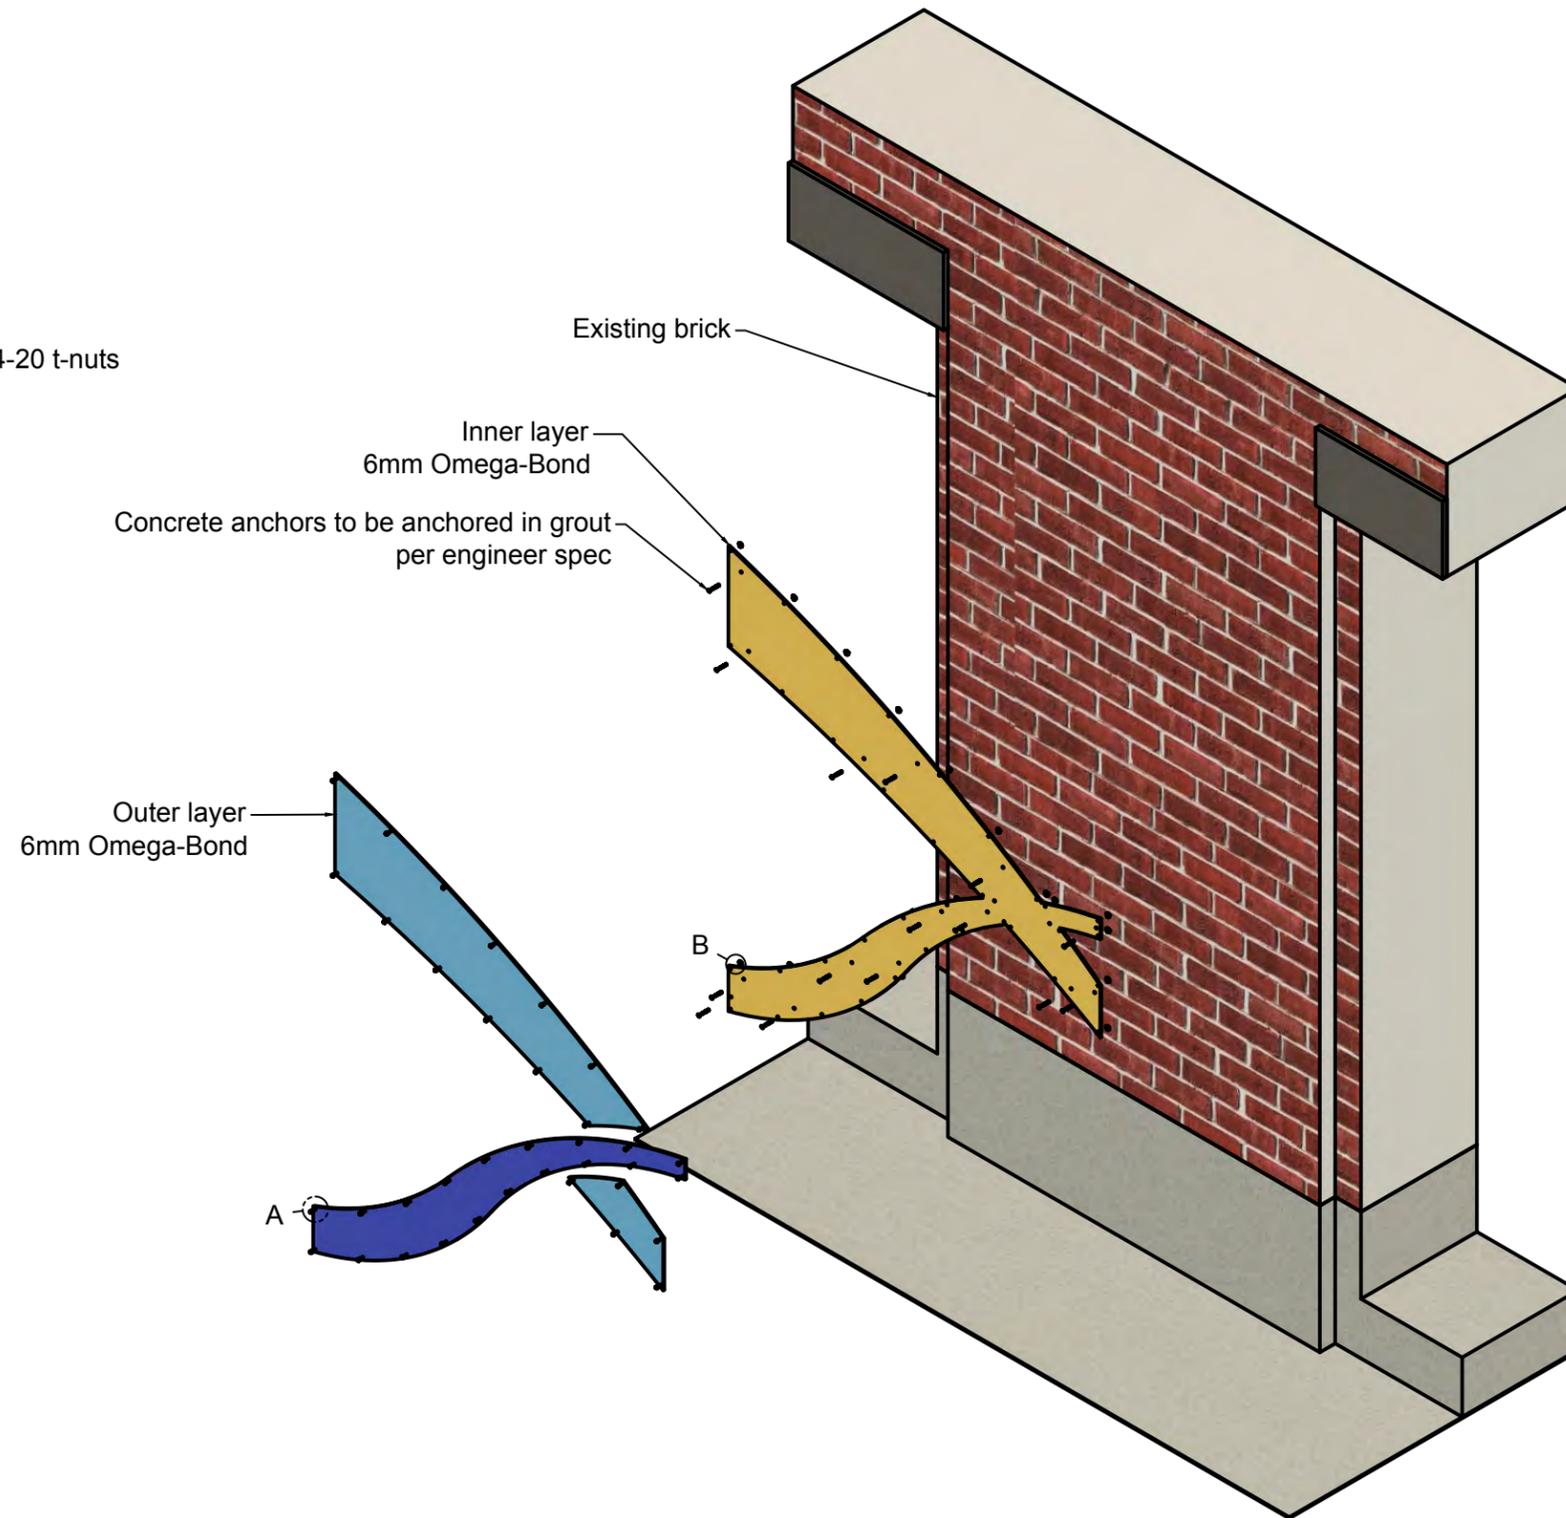

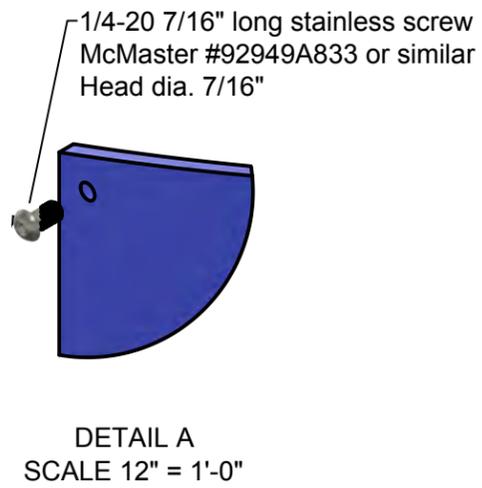

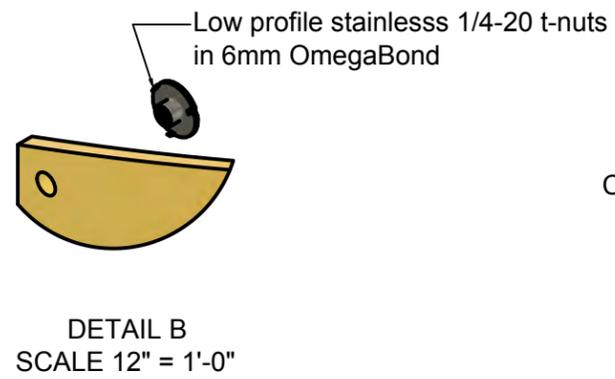

NEW

PREVIOUSLY APPROVED

FASTENER CONCEPT -

Instead of using adhesives as in the previous design, we will be using fasteners to ensure safety and ease of removal if any repairs need to be made.

1 - Exploded View

FASTENER TYPE AND LAYOUT -

These attractive stainless steel bolts will be carefully placed to follow the shape of the wave and mimic an industrial, riveted look, in keeping with the nautical history of the neighborhood.
