

February 5, 2021

Mr. Nicholas Moreno
Executive Director
Boston Conservation Commission
Boston City Hall - Room 709
Boston, MA 02201

**Subject: Request for Determination of Applicability
115 kV Transmission Line Replacement Project
North Washington Street, Boston Massachusetts**

Dear Mr. Moreno;

On behalf of Eversource Energy, AECOM hereby submits this revised Request for Determination of Applicability (RDA) pursuant to the requirements of the Massachusetts Wetlands Protection Act (WPA) (MGL Chapter 131, Section 40) and its implementing regulations (310 CMR 10.00), as well as the Boston Wetlands Ordinance for the proposed replacement of two underground 115 kilovolt (kV) electric transmission lines as well as the installation of pipe tie-in (transition) pits and manholes and temporary freeze pits within existing paved roadways in an Eversource right-of-way along North Washington Street beginning in Charlestown extending over the North Washington Street Bridge to Causeway Street in the City of Boston.

An RDA was previously filed with the Boston Conservation Commission on January 29, 2021 and this revised RDA is being re-submitted to address a few additional requests the Boston Conservation Commission had related to providing certified translation that the Abutter Letters in Italian and Spanish were properly translated, provide a Plan that is stamped by a Professional Engineer (PE) and a discussion within the RDA related to regulatory compliance within the 25-foot Waterfront Area.

The proposed project will be conducted within the paved roads of the right-of-way and will not result in direct permanent impacts to jurisdictional wetland resource areas. Appropriate erosion and sediment controls will be implemented during construction and all disturbed areas will be restored upon completion of the project. Therefore, the applicant requests that the Boston Conservation Commission issue a Negative Determination of Applicability.

The RDA application information includes a description of existing resource areas, a description of the proposed project, and plans depicting existing and proposed conditions. Please do not hesitate to contact the undersigned at 978.905.2270, or at the email address provided below, with any questions or comments. Thank you for your assistance.

Yours sincerely,

Thomas J. Keough

B. Determinations

1. I request the Boston Conservation Commission make the following determination(s). Check any that apply:

- a. whether the **area** depicted on plan(s) and/or map(s) referenced below is an area subject to jurisdiction of the Wetlands Protection Act.
- b. whether the **boundaries** of resource area(s) depicted on plan(s) and/or map(s) referenced below are accurately delineated.
- c. whether the **work** depicted on plan(s) referenced below is subject to the Wetlands Protection Act.
- d. whether the area and/or work depicted on plan(s) referenced below is subject to the jurisdiction of any **municipal wetlands ordinance** or **bylaw** of:

City of Boston
Name of Municipality

- e. whether the following **scope of alternatives** is adequate for work in the Riverfront Area as depicted on referenced plan(s).

WPA Form 1- Request for Determination of Applicability

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

C. Project Description

1. a. Project Location (use maps and plans to identify the location of the area subject to this request):

<u>North Washington Street</u> Street Address	<u>Boston</u> City/Town
<u>NA - Eversource ROW (roadway)</u> Assessors Map/Plat Number	<u>NA - Eversource ROW (roadway)</u> Parcel/Lot Number

b. Area Description (use additional paper, if necessary):

Existing paved right-of-way within Washington Street beginning at Harvard Street near City Square in Charlestown extending to the North Washington Street Bridge and then continuing from the downtown side of Bridge to Causeway Street in the City of Boston. The project is located at approximately the location of the mouth of the Charles River near the Charles River Dam and Inner Harbor.

c. Plan and/or Map Reference(s):

<u>115kV Line Construction and Test Hole Locations Project</u> Title	<u>2/5/2021</u> Date
<u>Site Locus Figure 1</u> Title	<u>1/15/2021</u> Date
<u>Resource Areas Figure 2</u> Title	<u>1/15/2021</u> Date

2. a. Work Description (use additional paper and/or provide plan(s) of work, if necessary):

The proposed underground electrical transmission line project will consist of replacing two 115 kilovolt (kV) lines within existing paved roadway within eight-inch coated steel pipe encased in fluidized thermal backfill. The pipes will be placed within a trench, and several pipe tie-in manholes will be installed. Temporary freeze pits will also be constructed. Following installation, all surfaces will be restored to original surface elevations and the Project will not result in any permanent impacts to jurisdictional resource areas. See Project Narrative for additional information.

WPA Form 1- Request for Determination of Applicability

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

C. Project Description (cont.)

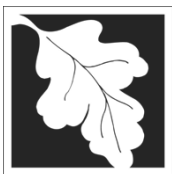

b. Identify provisions of the Wetlands Protection Act or regulations which may exempt the applicant from having to file a Notice of Intent for all or part of the described work (use additional paper, if necessary).

Under 310 CMR 10.02(2)(b)2.i, the proposed installation of underground utilities within existing paved roadway is considered a "minor activity" that is temporary and has negligible impacts. Per 310 CMR 10.02(2)(a) and (b), the proposed activity is not subject to regulation when it falls within the 100-foot Buffer Zone or Riverfront Area. However, the project is located within Land Subject to Coastal Storm Flowage (LSCSF), for which there are no performance standards contained in 310 CMR 10. There will be no dredging, removing, filling, or altering of resource areas since activities will be conducted within existing paved roads. Because the project otherwise meets the criteria for a minor activity, the Applicant requests that the Commission issue a Negative Determination of Applicability.

3. a. If this application is a Request for Determination of Scope of Alternatives for work in the Riverfront Area, indicate the one classification below that best describes the project.

- Single family house on a lot recorded on or before 8/1/96
- Single family house on a lot recorded after 8/1/96
- Expansion of an existing structure on a lot recorded after 8/1/96
- Project, other than a single-family house or public project, where the applicant owned the lot before 8/7/96
- New agriculture or aquaculture project
- Public project where funds were appropriated prior to 8/7/96
- Project on a lot shown on an approved, definitive subdivision plan where there is a recorded deed restriction limiting total alteration of the Riverfront Area for the entire subdivision
- Residential subdivision; institutional, industrial, or commercial project
- Municipal project
- District, county, state, or federal government project
- Project required to evaluate off-site alternatives in more than one municipality in an Environmental Impact Report under MEPA or in an alternatives analysis pursuant to an application for a 404 permit from the U.S. Army Corps of Engineers or 401 Water Quality Certification from the Department of Environmental Protection.

b. Provide evidence (e.g., record of date subdivision lot was recorded) supporting the classification above (use additional paper and/or attach appropriate documents, if necessary.)

WPA Form 1- Request for Determination of Applicability

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

D. Signatures and Submittal Requirements

I hereby certify under the penalties of perjury that the foregoing Request for Determination of Applicability and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge.

I further certify that the property owner, if different from the applicant, and the appropriate DEP Regional Office were sent a complete copy of this Request (including all appropriate documentation) simultaneously with the submittal of this Request to the Conservation Commission.

Failure by the applicant to send copies in a timely manner may result in dismissal of the Request for Determination of Applicability.

Name and address of the property owner:

Applications will only be accepted when submitted with a properly executed Extension Form.

Project Narrative

1. Introduction

On behalf of Eversource Energy, AECOM is submitting this Request for Determination of Applicability (RDA) application for the proposed replacement of two underground 115 kilovolt (kV) electric transmission lines as well as the installation of pipe tie-in (transition) pits and manholes and temporary freeze pits within existing paved roadways in an Eversource right-of-way along North Washington Street beginning in Charlestown extending over the North Washington Street Bridge to Causeway Street in the City of Boston (Figure 1).

It should be noted that the new North Washington Street Bridge (Charlestown Bridge) over the Charles River is currently under construction. As the bridge construction was authorized under the State's footprint bridge program under the Transportation Bond Bill, the bridge and its appurtenances are exempt from Massachusetts Wetlands Protection Act (WPA) permitting and this RDA is only for the landside replacement of the electrical transmission lines located in the roadway (and bridge approaches) near the bridge.

Portions of the Project Site and temporary impacts are located within the 100-foot Buffer Zone to Coastal Bank, Land Subject to Coastal Storm Flowage (LSCSF) and 25-foot Waterfront Area (regulated by the City of Boston Wetlands Ordinance) associated with Inner Harbor at the confluence of the Charles River (Figure 2). The MassDEP map for the mouth of river depicts the river terminating at the Charles River Dam (locks) located to the west of the Project Site (Figure 2). The project will temporarily impact approximately 2,380 square feet (SF) of LSCSF during installation of the new transmission lines, manholes, and temporary freeze pits. All work within the 100-foot Buffer Zone, 25-foot Waterfront Area and LSCSF will take place within the existing paved right-of-way within the roadway layout; appropriate erosion and sedimentation controls will be implemented during construction; all surfaces will be restored to their original condition and elevation; and the Project will not result in any permanent impacts to jurisdictional areas.

Under 310 CMR 10.02(2)(b)2.i, the proposed installation of underground utilities within existing paved roadways is considered a "minor activity" that is temporary and has negligible impacts. Per 310 CMR 10.02(2)(a) and (b), the proposed activity is not subject to regulation when it falls within the 100-foot Buffer Zone or Riverfront Area. However, the project is also located within LSCSF, for which there are no performance standards contained in 310 CMR 10.00.

The proposed project qualifies as a "Limited Project" under the WPA regulations for coastal resource areas including 310 CMR 10.24(7)(b) for the construction of an underground public utility (electric transmission line). Because the Project otherwise meets the criteria for a minor activity, is a Limited Project and will not permanently alter any existing resource areas, the proponent respectfully requests that the Boston Conservation Commission issue a Negative Determination of Applicability.

2. Existing Conditions

The project in its entirety extends from Harvard Street in Charlestown to the North Washington Street Bridge and then extends from the North Washington Street Bridge to Causeway Street in the City of Boston (note the portion of transmission lines within the North Washington Street Bridge is not part of this RDA). Only the portions of the project that are located within LSCSF and the Buffer Zone are the subject of the RDA. The boundaries of the resource area located in close proximity to the proposed work (depicted on Figure 2, Appendix A) were identified using GIS mapping with data supplied from the MassGIS website and the City of Boston.

According to MassDEP maps of the mouth of river for the Charles River, the portion of the Charles River located adjacent to the North Washington Street Bridge area is not mapped as a river since the river starts at the Charles River Dam; therefore, the Site does not contain associated Riverfront Area.

2.1 Regulated Areas under the WPA and City of Boston

The Project area contains Coastal Bank, 100-foot Buffer Zone to Coastal Bank, LSCSF and 25-foot Waterfront Area (regulated by the City of Boston Wetlands Ordinance) associated with the Inner Harbor. These wetland resource areas are described in greater detail below. Wetland resource areas located on the site are subject to the Massachusetts Wetlands Protection Act (MGL C. 131, s. 40) and Regulations (310 CMR 10.00) and the City of Boston Wetlands Ordinance.

According to MassDEP maps of the mouth of river for the Charles River, the Charles River located adjacent to the North Washington Street Bridge terminates at the Charles River Dam (locks); therefore, the Site does not contain associated Riverfront Area.

2.1.1 Land Subject to Coastal Storm Flowage (310 CMR 10.04)

Land Subject to Coastal Storm Flowage is defined as land subject to any inundation caused by coastal storms up to and including that caused by the 100-year storm, surge or record or storm of record, whichever is greater. The areas mapped by the Federal Emergency Management Agency (FEMA) on community Flood Insurance Rate Maps (FIRM) as the 100-year flood plain within the coastal zone are included within LSCSF. As per FIRM panel 25025C0081J, effective March 16, 2016, the Project Site is located within an AE zone with a base flood elevation of 10 feet North American Vertical Datum (NAVD 88).

2.1.2 Coastal Bank (310 CMR 10.30)

The boundary of Coastal Bank of the Charles River in the Project area is defined by the top of the granite block seawall/abutments that form the side boundaries of the river. The WPA regulations and Boston Wetlands Protection Ordinance establish a 100-foot Buffer Zone from the top of the Coastal Bank. In addition, the Boston Wetlands Ordinance establishes a 25-foot Waterfront Area from the Coastal Bank.

Coastal Bank provides important vertical buffers and are significant to storm damage prevention and flood control. Portions of the proposed work is within 100 feet of a Coastal Bank, however, per 310 CMR 10.02(2)(a) and (b), the proposed activity is not subject to regulation when it falls within the 100-foot Buffer Zone or Riverfront Area.

2.1.3 Rare Species

According to the 14th Edition of the Massachusetts Natural Heritage & Endangered Species Program (NHESP) Atlas (August 1, 2017), there are no Priority Habitats of Rare Species, Estimated Habitats of Rare Wildlife or Certified Vernal Pools on or near the site.

Additionally, there are no Outstanding Resource Waters (ORWs) in the area.

3. Project Description

Eversource is proposing to replace two underground 115 kV lines and also install manholes within existing paved roadway beginning at Harvard Street in Charlestown extending to the North Washington Street Bridge and then continuing from the North Washington Street Bridge to Causeway Street in the City of Boston. The portion of the transmission lines within the North Washington Street Bridge is not part of the RDA. Authorization to install electric utilities within the section of the North Washington Street Bridge was previously authorized via a 401 Water Quality Certification during the permitting process for the new bridge replacement project currently underway as it is part of the State's footprint bridge program and therefore is exempt from WPA permitting. Temporary freeze pits will be constructed in order to prevent spillage while making the splicing connection. Please note that only one of the proposed freeze pits and pipe tie-in transition manholes (MH Transition Pit #S2 and MH Freeze Pit #S2) is located within the 100-foot Buffer Zone subject to this RDA (the other freeze pits and manholes are located beyond any resource areas). The Project will temporarily impact approximately 2,380 SF of LSCSF during installation of the new transmission lines.

Generally, there are six principal phases of construction for an underground cable project within streets:

- Installation of BMPs and erosion control measures;
- Test pits to locate existing utilities;
- Temporary manhole/freeze pit installation;
- Trenching and pipe installation;
- Cable pulling, splicing, and testing; and
- Final pavement/surface restoration

The proposed underground electric lines will consist of three cables, each within an eight-inch coated steel pipe encased in fluidized thermal backfill (FTB). The pipes will be placed within a trench using the open cut trench method as described below.

3.1 Open Cut Trench Method

The method for underground electric line installation in roadways is open cut trenching. The open cut trench method consists of cutting the existing pavement and digging an excavation. The width of the trench will be marked on the street and is anticipated to be approximately seven feet in width and nine feet in depth. Dig Safe will be contacted, and the location of any other utilities will be marked. Following the pavement saw cut, the existing pavement will be removed and loaded into a dump truck for proper disposal. Pavement will be handled separately from soil and will be recycled at an asphalt batching plant. Trenches will be constructed using backhoes or excavators. A "clean trench" or "live loading" method will be used for removal or excavated soils, where soil will be loaded directly into a dump truck for temporary off-site stockpiling or hauling to an off-site facility for recycling, re-use and disposal. The excavated soil will not be stockpiled along the roadway.

Once excavated, the trench will be shored as required by soil conditions, Occupational Safety and Health Administration (OSHA) safety rules, and local and state regulations. All excavation, backfilling and safety practices will be done in accordance with Eversource Standards, as well as Department of Transportation Title 49 Part 192, Massachusetts Department of Labor and Industries Bulletin 12, and the U.S. Department of Labor OSHA Title 29 Part 1910. Excavated materials that meet Massachusetts Department of Telecommunications and Energy (MDTE) Standard 98-22 Section 8.8 guidelines were reused as backfill.

The proposed work will be done in coordination with the City of Boston Public Improvements Commission (PIC), the City of Boston Public Works Department (BPWD), the City of Boston Transportation Department (BTD), and the Boston Water & Sewer Commission (BWSC) to obtain the required Grants of Location (GOL) necessary to construct the underground facilities.

3.2 Pipe Tie-In Manholes and Freeze Pits

Pipe-tie in (transition) pits and manholes (MH) and temporary freeze pits are proposed as part of the Project. MH Transition Pit #S2 and MH Freeze Pit #S2 (downtown side of project) are part of this RDA since they are located within the 100-foot Buffer Zone (the other proposed manholes and freeze pits are located outside any resource area, so they are not part of the RDA). The pipe-tie in (transition) pit and manhole is approximately nine feet in width, eight feet in depth and 20 feet in length. The temporary freeze pit will be approximately eight feet in width, nine feet in depth and 14 feet in length. The freeze pit will be temporarily topped with an aboveground access shed and after the work is complete the shed will be removed. Test pits will be installed at regular intervals along the proposed line and in close proximity to the proposed manholes/freeze pit locations.

3.3 Cable Installation and Testing

Prior to cable installation, each pipe will be tested and cleaned by pulling a mandrel (a close-fitting cylinder designed to confirm a pipe's shape and size) and swab through the pipe. When the swab and mandrel have been pulled successfully, the pipe is ready for cable installation.

Three cables will be installed in each pipe. To install each cable section, a cable reel will be set up at the "pull-in" manhole and a cable puller will be set up at the "pull-out" manhole. Following the initial pulling of the mandrel and pulling line through each pipe, a hydraulic cable pulling winch and tensioner will be used to individually pull cable from the pull-in to the pull-out manhole. Once the complete cable system is installed, it will be field-tested. At the completion of successful testing, the line will be energized.

3.4 Pavement Restoration

Following installation of the underground electric line, roadway surfaces will be restored to pre-construction condition in accordance with the Department of Public Utilities "Standards to be Employed by Public Utility Operators When Restoring and of the Streets, Lanes and Highways in Municipalities" (D.T.E. 98-22) ("Repaving Standards") and municipal standards.

3.5 Best Management Practices

Potential impacts to resource areas would be due to excavation spillage, runoff or trench washout during significant rain conditions. These concerns will be addressed using various work procedures and the placement of protective barriers as follows:

- No work shall be performed adjacent to resource areas during significant rain events to minimize runoff and washout situations;
- Catch basins will be protected as needed with filter fabric to ensure that sediments do not enter the drainage system;
- Erosion controls will be utilized and inspected on a regular basis and maintained in working condition until all disturbed areas are stabilized;
- If appropriate, the contractor will seek authorization for dewatering discharges through a Remediation General Permit, and will manage any contaminated soil that may be found within the urban fill in accordance with MassDEP regulations;
- All trenches will be closed by a secure steel plate at the end of each day.

4. Regulatory Compliance

The proposed project qualifies as a "Limited Project" under the WPA regulations for coastal resource areas including 310 CMR 10.24(7)(b) for the construction of an underground public utility (electric transmission line).

As afforded at 310 CMR 10.24(7), it is within the issuing authority's discretion to consider the magnitude of the alteration and the significance of the project site to the interests identified in M.G.L. c. 131 § 40, the availability of reasonable alternatives to the proposed activities, the extent to which disturbances are minimized, and the extent to which mitigation measures, including restoration, are provided to contribute to the protection of the interests identified in M.G.L. c. 131 § 40.

In addition, under 310 CMR 10.02(2)(b)2.i, the proposed installation of underground utilities within existing paved roadways in Buffer Zone is considered a "minor activity" that is temporary and has negligible impacts.

4.1 Resource Area General Performance Standards

The WPA Regulations provide specific Performance Standards for work within wetland resource areas. The WPA Regulations nor the Boston Wetlands Ordinance provide performance standards for work within LSCSF; however, as previously described, the final condition and elevation of the area of LSCSF will not change and will remain to withstand wave action and erosion from a 100-year storm event.

4.1.1 Land Subject to Coastal Storm Flowage

LSCSF extends to the edge of the 100-year floodplain. LSCSF does not have any Performance Standards under the WPA Regulations or Boston Wetlands Ordinance. Work within LSCSF is temporary as all elevations within the LSCSF will be restored to the original pre-construction conditions. The project will temporarily impact approximately 2,380 SF of LSCSF during installation of the new transmission line.

The proposed project will have no adverse effect on coastal flooding because there will be no significant permanent changes to the existing elevations and levels of disturbance in the area. The final condition and elevation of the area of LSCSF will not change and will remain to withstand potential wave action and erosion from a 100-year storm event.

4.1.2 Coastal Bank

The Project activities take place within the 100-foot Buffer Zone and 25-foot Waterfront Area of Coastal Bank. However, there will be no dredging, removing, filling, or altering of a Coastal Bank as part of the Project because activities will be conducted within existing paved roads. Per 310 CMR 10.02(2)(a) and (b), the proposed activity is not subject to regulation when it falls within the 100-foot Buffer Zone. The Boston Wetland ordinance also does not have any additional performance standards for Coastal Bank. Therefore, the Project complies with the regulations.

4.1.3 25-foot Waterfront Area

The City of Boston Wetlands Ordinance affords protection of a 25-foot Waterfront Area which includes the area that extends 25 feet horizontally from the edge of any coastal beach, dune, bank, tidal flat, rocky intertidal shore, salt marsh or land containing shellfish; or any inland bank, lake, pond, intermittent stream, brook, creek or riverfront area.

The project site contains a 25-foot Waterfront Area that extends 25 feet from Coastal Bank of the granite block seawall/abutments.

The City of Boston local wetlands protection ordinance protects the following resource area values, including, but not limited to: protection of the public or private water supply and quality; protection of the public and private groundwater supply and quality; short term and long term coastal and

stormwater flood control, erosion and sedimentation control; storm damage prevention, including coastal storm flowage; protection of surface water supply and quality, including water pollution control; flood conveyance and storage; protection of fisheries, land containing shellfish, wildlife habitat, rare and endangered plant and animal species and habitat, wetland plant habitat, and recreation, and to protect the health, safety, and welfare of the public and to mitigate impacts from climate change.

The land area within the 25-foot Waterfront Area is currently a highly urbanized and densely developed commercial area that has been previously disturbed from past land use activities that contains buildings, residential apartment buildings and existing paved roadway and bridge approaches associated with the North Washington Street Bridge.

The Project Area and the 25-foot Waterfront Area is associated with the roadway and bridge approaches. The work will not result in direct or indirect impacts to any resource area values, as the proposed work is located underground, beneath existing paved roads, and the 25-foot Waterfront Area will be restored to pre-construction conditions.

4.2 Compliance with Massachusetts Stormwater Policy

There are no new discharges or increase of impervious surfaces associated with the proposed project; therefore, this project is not subject to provisions of the Massachusetts Stormwater Standards or Policy. All underground transmission line work and manhole installations will be conducted within existing paved roadways.

4.3 Climate Change Resiliency

The Project Site consists of a paved right-of-way which protects the interest of storm damage prevention or flood control. However, the Project will not change the current characteristic of the Site, and work will be completed prior to any anticipated increase in the duration or intensity of flooding events due to climate change. Climate change resiliency to the Coastal Bank will be maintained during construction because no alterations will occur to Coastal Bank. No changes will be made to the current effectiveness of storm damage prevention and flood control that the Coastal Bank may have. Work will be completed prior to any anticipated increase in the duration or intensity of flooding events due to future climate change.

Eversource is committed to climate change resiliency by being a lead example in emissions reduction and setting goals to achieve carbon neutrality. They are quantifying, disclosing, and reducing their carbon footprint, and their goal is to become carbon neutral in operations by 2030. Eversource is focused on clean energy and finding innovative solutions to mitigate their operational emissions. Eversource carries these values into their day-to-day projects. The Eversource 2019 Sustainability Report provides details on their progress and future goals in terms of becoming a more climate-resilient company.

5. Summary

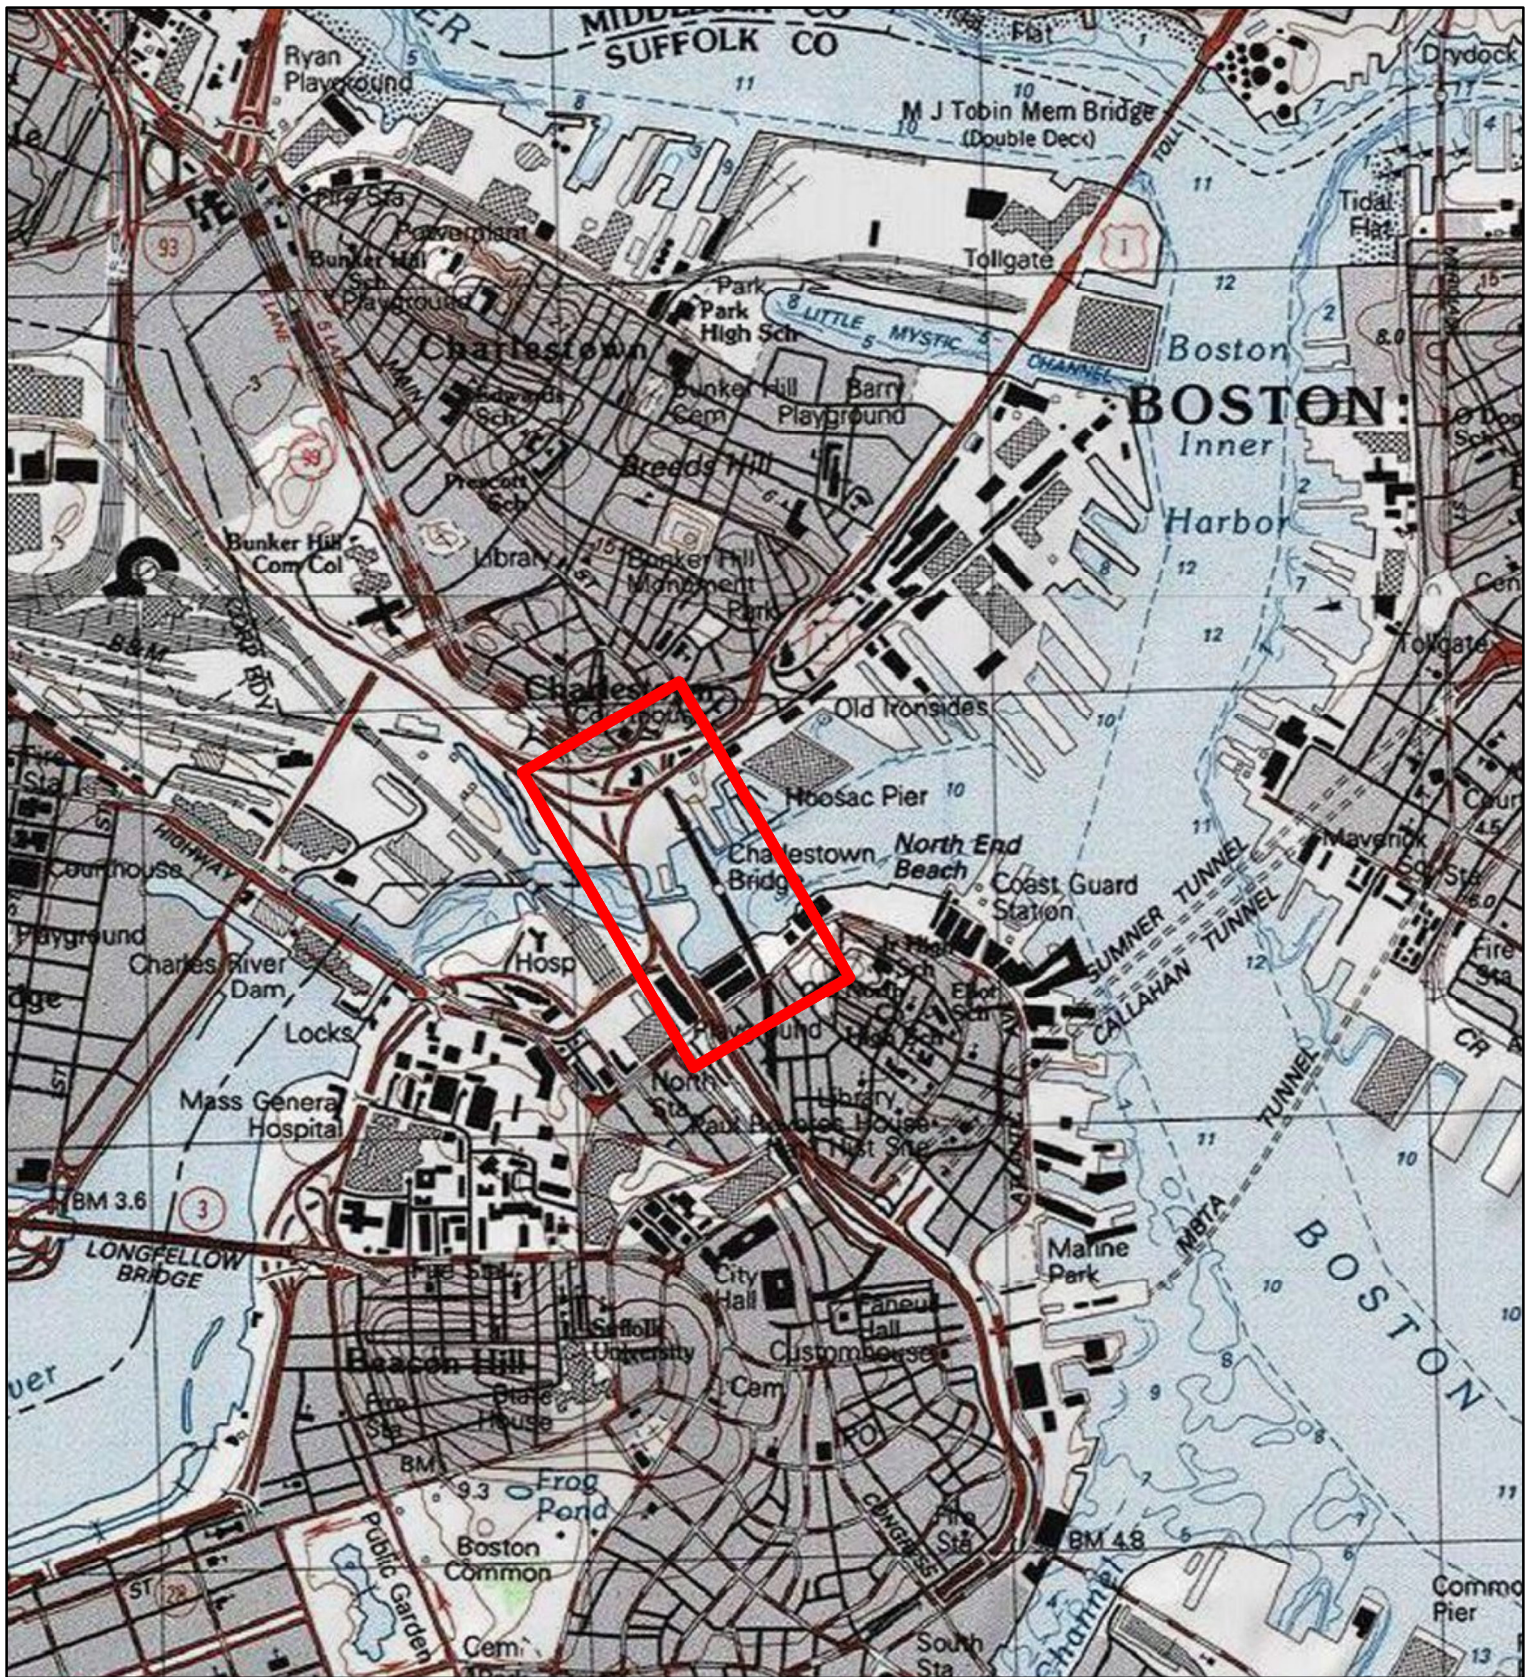

The replacement of Eversource's 115 kV utility lines is necessary maintenance associated with the new bridge and is considered a "minor activity" and Limited Project. The Project will not result in direct permanent impacts to jurisdictional wetland resource areas including the LSCSF and Coastal Bank. All elevations will be restored within the LSCSF and work will be conducted within the paved roads of the right-of-way, therefore will not alter any part of the Coastal Bank. Appropriate erosion and sediment controls will be implemented during construction. Therefore, the applicant requests that the Boston Conservation Commission issue a Negative Determination of Applicability.

AFFIDAVIT OF SERVICE

Under the *Massachusetts Wetlands Protection Act* and the *City of Boston Wetlands Protection Ordinance and Regulations*

I, Matt Devlin, hereby certify under the pains and penalties of perjury that on January 29, 2020 I gave notification to abutters in compliance with the second paragraph of Massachusetts General Laws Chapter 131, Section 40 and 310 CMR 10.05 (4) (a) and the City of Boston Wetlands Protection Ordinance in connection with the following matter:

A Request for Determination of Applicability filed under the Massachusetts Wetlands Protection Act and the City of Boston Wetlands Protection Ordinance and Regulations by AECOM, on behalf of the Applicant, Eversource Energy on January 29, 2020 for the replacement of two 115 kilovolt (kV) underground electrical transmission lines as well as the installation of pipe tie-in (transition) pits and manholes and temporary freeze pits within existing paved roadways in an Eversource right-of-way along North Washington Street beginning in Charlestown extending over the North Washington Street Bridge to Causeway Street in the City of Boston.

The form of notification, and a list of the abutters to whom it was given and their addresses, are attached to this Affidavit of Service.

Matt Devlin
Senior Wetland Scientist

January 29, 2020
Date

**NOTIFICATION TO ABUTTERS
BOSTON CONSERVATION COMMISSION**

In accordance with the Massachusetts Wetlands Protection Act, Massachusetts General Laws Chapter 131, Section 40, and the Boston Wetlands Ordinance, you are hereby notified as an abutter to a project filed with the Boston Conservation Commission.

A. **Eversource Energy** has filed a Request for Determination of Applicability with the Boston Conservation Commission seeking permission to alter an Area Subject to Protection under the Wetlands Protection Act (General Laws Chapter 131, section 40) and Boston Wetlands Ordinance.

B. The address of the lot where the activity is proposed is North Washington Street.

C. The project involves **the replacement of two 115 kilovolt (kV) underground electrical transmission lines as well as the installation of pipe tie-in (transition) pits and manholes and temporary freeze pits within existing paved roadways in an Eversource right-of-way along North Washington Street beginning in Charlestown extending over the North Washington Street Bridge to Causeway Street in the City of Boston.**

D. Copies of the Notice of Intent may be obtained by contacting the Boston Conservation Commission at CC@boston.gov.

E. Copies of the Notice of Intent may be obtained from **Matthew Devlin of AECOM at (978) 905-2355** or matt.devlin@aecom.com 9am to 4pm, Monday-Friday.

F. In accordance with the Commonwealth of Massachusetts Executive Order Suspending Certain Provisions of the Open Meeting Law, the public hearing will take place **virtually** at <https://zoom.us/j/6864582044>. If you are unable to access the internet, you can call 1-929-205-6099, enter Meeting ID 686 458 2044 # and use # as your participant ID.

G. Information regarding the date and time of the public hearing may be obtained from the **Boston Conservation Commission** by emailing CC@boston.gov or calling (617) 635-3850 between the hours of 9 AM to 5 PM, Monday through Friday.

NOTE: Notice of the public hearing, including its date, time, and place, will be published at least five (5) days in advance in the **Boston Herald**.

NOTE: Notice of the public hearing, including its date, time, and place, will be posted on www.boston.gov/public-notice and in Boston City Hall not less than forty-eight (48) hours in advance.

NOTE: If you would like to provide comments, you may attend the public hearing or send written comments to CC@boston.gov or Boston City Hall, Environment Department, Room 709, 1 City Hall Square, Boston, MA 02201

NOTE: You also may contact the Boston Conservation Commission or the Department of Environmental Protection Northeast Regional Office for more information about this application or the Wetlands Protection Act. To contact DEP, call: the Northeast Region: (978) 694-3200. www.001-translation.com

**NOTIFICACIÓN PARA PROPIETARIOS Y/O VECINOS COLINDANTES
COMISIÓN DE CONSERVACIÓN DE BOSTON**

De conformidad con la Ley de protección de los humedales de Massachusetts, el Capítulo 131, Sección 40 de las Leyes Generales de Massachusetts y la Ordenanza sobre los humedales de Boston, por la presente queda usted notificado como propietario o vecino colindante de un proyecto presentado ante la Comisión de Conservación de Boston.

A. **Eversource** ha presentado una solicitud a la Comisión de Conservación de Boston pidiendo permiso para modificar una zona sujeta a protección en virtud de la Ley de protección de los humedales (Leyes generales, capítulo 131, sección 40) y la Ordenanza sobre los humedales de Boston.

B. La dirección del lote donde se propone la actividad es **North Washington Street**.

C. El proyecto consiste en **la sustitución de dos líneas de transmisión eléctrica subterránea de 115 kilovoltiales(kV), así como la instalación de pozos y alcantarillas de tuberías (transición) y pozos de congelación temporales dentro de las carreteras pavimentadas existentes en un camino de Eversource a lo largo de North Washington Street comenzando en Charlestown extendiéndose sobre el puente de North Washington Street hasta Causeway Street en la ciudad de Boston.**

D. Se pueden obtener copias del Aviso de Intención comunicándose con la Comisión de Conservación de Boston en CC@boston.gov.

E. Las copias de la notificación de intención pueden obtenerse en **Matthew Devlin de AECOM al (978) 905-2355 o matt.devlin@aecom.com** entre el horario de **9am a 4pm**, de lunes a viernes.

F. De acuerdo con el Decreto Ejecutivo de la Mancomunidad de Massachusetts que suspende ciertas disposiciones de la Ley de reuniones abiertas, la audiencia pública se llevará a cabo virtualmente en <https://zoom.us/j/6864582044>. Si no puede acceder a Internet, puede llamar al 1-929-205-6099, ingresar ID de reunión 686 458 2044 # y usar # como su ID de participante.

G. La información relativa a la fecha y hora de la audiencia pública puede solicitarse a la **Comisión de Conservación de Boston** por correo electrónico a CC@boston.gov o llamando al **(617) 635-4416** entre las **9 AM y las 5 PM, de lunes a viernes**.

NOTA: La notificación de la audiencia pública, incluida su fecha, hora y lugar, se publicará en el **Boston Herald** con al menos cinco (5) días de antelación.

NOTA: La notificación de la audiencia pública, incluida su fecha, hora y lugar, se publicará en www.boston.gov/public-notices y en el Ayuntamiento de Boston con no menos de cuarenta y ocho (48) horas de antelación. Si desea formular comentarios, puede asistir a la audiencia pública o enviarlos por escrito a CC@boston.gov o al Ayuntamiento de Boston, Departamento de Medio Ambiente, Sala 709, 1 City Hall Square, Boston, MA 02201.

NOTA: También puede comunicarse con la Comisión de Conservación de Boston o con la Oficina Regional del Noreste del Departamento de Protección Ambiental para obtener más información sobre esta solicitud o la Ley de Protección de Humedales. Para comunicarse con el DEP, llame a la Región Noreste: (978) 694-3200.

NOTA: si tiene previsto asistir a la audiencia pública y necesita servicios de interpretación, sírvase informar al personal en CC@boston.gov antes de las 12 PM del día anterior a la audiencia.

AVVISO AI CONFINANTI
COMMISSIONE CONSERVAZIONE BENI AMBIENTALI, COMUNE DI BOSTON

Ai sensi del “Massachusetts Wetlands Protection Act” (Legge sulla Protezione delle Zone Palustri), “Massachusetts General Laws” (Leggi Generali del Massachusetts) Capitolo 131, Sezione 40, e del “Boston Wetlands Ordinance” (Ordinanza Comunale sulle Paludi), l'utente viene informato in qualità di confinante di un progetto depositato presso la “Boston Conservation Commission” (Commissione Conservazione Beni Ambientali del Comune di Boston).

A. **Eversource Energy** ha presentato una domanda alla Commissione Conservazione Beni Ambientali di Boston al fine di ottenere l'autorizzazione a modificare un'area soggetta a protezione ai sensi della legge sulla protezione delle zone palustri (leggi generali capitolo 131, sezione 40) e dell'Ordinanza Comunale sulle Paludi.

B. L'indirizzo del lotto in cui viene proposta l'attività è North Washington Street.

C. Il progetto prevede **la sostituzione di due linee sotterranee di trasmissione elettrica da 115 kilovolt(kV)**, nonché l'installazione di pozzi e tombini di collegamento di tubi (**transizione**) e **pozzi di congelamento temporaneo all'interno delle strade asfaltate** esistenti in un diritto di passaggio **Eversource lungo North Washington Street che inizia a Charlestown, estendendosi sul North Washington Street Bridge fino a Causeway Street nella città di Boston.**

D. È possibile ottenere copie dell'Avviso d'intento contattando la Commissione Conservazione Beni Ambientali del Comune di Boston all'indirizzo CC@boston.gov.

E. Copie dell'avviso d'intento possono essere ottenute rivolgendosi a Matthew Devlin di **AECOM** chiamando il numero (978) 905-2355 o inviando una mail a matt.devlin@aecom.com tra le 9:00 e le 16:00, dal lunedì al venerdì

F. In conformità con l'Ordine esecutivo del Commonwealth del Massachusetts che sospende alcune disposizioni della legge sulle riunioni aperte al pubblico, l'udienza pubblica si svolgerà virtualmente su <https://zoom.us/j/6864582044>. Qualora non si riuscisse ad accedere a Internet, si può chiamare il numero 1-929-205-6099, inserire come MeetingID 686 458 2044 # e utilizzare # come ID partecipante.

G. Le informazioni relative alla data e all'ora dell'udienza pubblica possono essere ottenute dalla “**Boston Conservation Commission**” (Commissione Conservazione Beni Ambientali di Boston) inviando un'e-mail a CC@boston.gov o chiamando il numero (617) 635-4416 dalle 9:00 alle 17:00, dal lunedì al venerdì.

NOTA: l'avviso di udienza pubblica, comprensivo di data, ora e luogo, sarà pubblicato con almeno cinque (5) giorni di anticipo sul giornale “Boston Herald”.

NOTA: l'avviso di udienza pubblica, comprensivo di data, ora e luogo, sarà pubblicato sul sito www.boston.gov/public-notices e presso il Municipio di Boston con almeno quarantotto (48) ore di anticipo. Se si desidera esprimere dei commenti, e' possibile partecipare all'udienza pubblica o inviare commenti scritti a CC@boston.gov o al Municipio di Boston, Dipartimento Ambiente: Boston City Hall, Environment Department Room 709, 1 City Hall Square, Boston, MA 02201

NOTA: è inoltre possibile contattare la Commissione Conservazione Beni Ambientali di Boston o l'ufficio regionale del Nordest del Dipartimento Protezione Ambiente (DEP) per ulteriori informazioni su questa applicazione o sulla legge sulla protezione delle Zone palustri. Per contattare il DEP, chiamare: the Northeast Region al numero (978) 694-3200.

NOTA: per chi intende partecipare all'udienza pubblica e ha bisogno di un interprete, si prega di informare il personale competente all'indirizzo CC@boston.gov entro le 12:00 del giorno precedente all'udienza.
