	<p>11 IRVING STREET MIRCOM TELE-ENTRY PANEL WITH CUSTOM MADE BRASS HOUSING</p> <p><b>Roy</b> After evaluating 11 Irving Street again it would not be possible to mount on the wooden door trim for the following reasons. 1. It is stationary door, however I'm sure they open it for large deliveries. 2. It wouldn't completely fit and hang over onto the glass. 3. It would be problematic to relocate the existing wires to that location.</p> <p>Feel free to contact me if you have any questions.</p>

## SLIM LINE TELEPHONE ACCESS SYSTEMS

**[TX3] Series**

TELEPHONE/CARD ACCESS SYSTEMS

### Features

- TCP/IP capability for remote programming by adding a TX3-IP module
- Stainless steel front panel
- Universal Series slim line enclosure with built-in rain hood
- Scrolling 4 x 20 backlit LCD display that eliminates the need for an external directory
- Available in 200, 1000 and 2000 name capacities
- Backlit 16 digit keypad with dedicated operational buttons for Page Up, Page Down, Call and Info
- Provision for postal lock or card reader (TX3-P300-HA card reader sold separately)
- Multi-lingual Display and Voice Greeting (English, French-Canadian and Spanish) that provides instructions on how to use entry panel
- Concierge/Security Desk/Guard Phone capability
- Supports both AutoDialer (ADC) and NSL (No phone bill)
- Ability to network panels together (peer-to-peer)
- Dials up to 18 digit telephone numbers
- System can be configured locally using the keypad or a computer with the TX3 configuration software
- Upload/download configuration files without taking the whole system offline
- Remote programming requires a computer equipped with a modem and a TX3-MDM modem module installed in the lobby unit
- Programmable daily usage postal lock
- 5000 record event log
- Provision for a covert color camera; CAM-3

### Description

Mircom's TX3 Slim Line Telephone Access Systems are designed to provide primary resident/visitor access control for small condominiums, apartment buildings, office buildings, gated communities and industrial buildings with up to 2000 residents or users. The slim design is ideal for applications with limited space, or for applications where a separate directory exists or is not required.

The Universal Series enclosure is constructed of a heavy gauge stainless steel and can be used in a lobby or outdoors. Surface, semi-flush or pedestal mount applications are supported. The Universal Series enclosure features a built-in rain hood, microphone, tamper resistant speaker and has provisions for a postal lock and color camera to be installed.

The TX3 Slim Line systems feature a back-lit 4 line by 20 character electronic LCD display that scrolls a programmable banner message as well as the resident names and dial codes. The system also features a 16 digit backlit telephone style keypad with dedicated operational buttons for Page Up, Page Down, Call and Info. In addition, the system features a configurable multilingual display and voice prompts with a choice of English, Spanish, or French-Canadian.

The systems are programmable via the built-in keypad or using a computer with the optional TX3 configuration software. In addition the systems can also be configured remotely using the TX3 configuration software and the TX3-MDM Modem Module.

### Applications

- Provides resident/visitor access control for small buildings such as condominiums, apartment buildings, office buildings, gated communities and industrial buildings with up to 2000 residents or users
- Slim design is ideal for applications with limited space, or for applications where a separate directory exists or is not required
- Surface, semi-flush or pedestal mounting options (Optional adapter plate required to mount to a standard gooseneck post)

**CATALOG NUMBER 6557**

NOT TO BE USED FOR INSTALLATION PURPOSES.

Mircom reserves the right to make changes at any time without notice in prices, colours, materials, components, equipment, specifications and models and also to discontinue models.

The TX3 Slim Line systems utilize a hands-free, full duplex telephone communications between residents and visitors for granting access into the building. The systems are configurable to support both an AutoDialer (ADC) system, which uses a dedicated phone line to dial preprogrammed numbers when the unique directory code is entered, and a No Phone Bill (NSL) system, which does not require a dedicated phone line.

The TX3 Slim Line systems come standard as an ADC system and requires only a dedicated phone line. For NSL configuration the systems requires additional hardware components such as relay cards and relay cabinets. (Please refer to the ordering information.)

## Dimensions

**TX3-200-4U-B / TX3-1000-4U-B / TX3-2000-4U-B**

One-Time Total	\$4,200.00
Total Price	\$5,400.00

On Tue, Apr 6, 2021 at 10:52 AM, Ben Newman <[ben.newman@butterflymx.com](mailto:ben.newman@butterflymx.com)> wrote:

Morning Evan and Roy,

Glad Klim was able to make it out to the property, and that metrocom will be able to help with the installation of our intercom as well as the brass cover box.

In regards to your request for the panel be installed on the front entrance door itself, as opposed to the wall. ButterflyMX's response, and recommendation is below:

We (ButterflyMX) typically adhere to the advice of our installation partner since they have the experience and expertise in installing ButterflyMX. In this case, Metrocom strongly discourages installing our intercom on the door as it exposes the intercom panel to damage that it would not otherwise have. Furthermore, of the more than 6,000 panels installed across the country, none have been installed on a door. They have been installed on the wall next to a door or on a pedestal very near to a door (or gate).

Here are [Photos of Recent ButterflyMX Installs](#) so you can see how our 6,000+ clients have ButterflyMX installed at their buildings.

Will this email suffice to allow the intercom to be mounted on the wall like it's supposed to be?

Let me know how else I can help, or if you have any questions.
