

# SUMMER STREET BUS/TRUCK LANE

## WHAT IS THIS ABOUT?

We're launching a six-month pilot bus/truck lane program on Summer Street between South Station to East First Street in South Boston. This project will also add new bike lanes between existing infrastructure and improve the pedestrian experience.

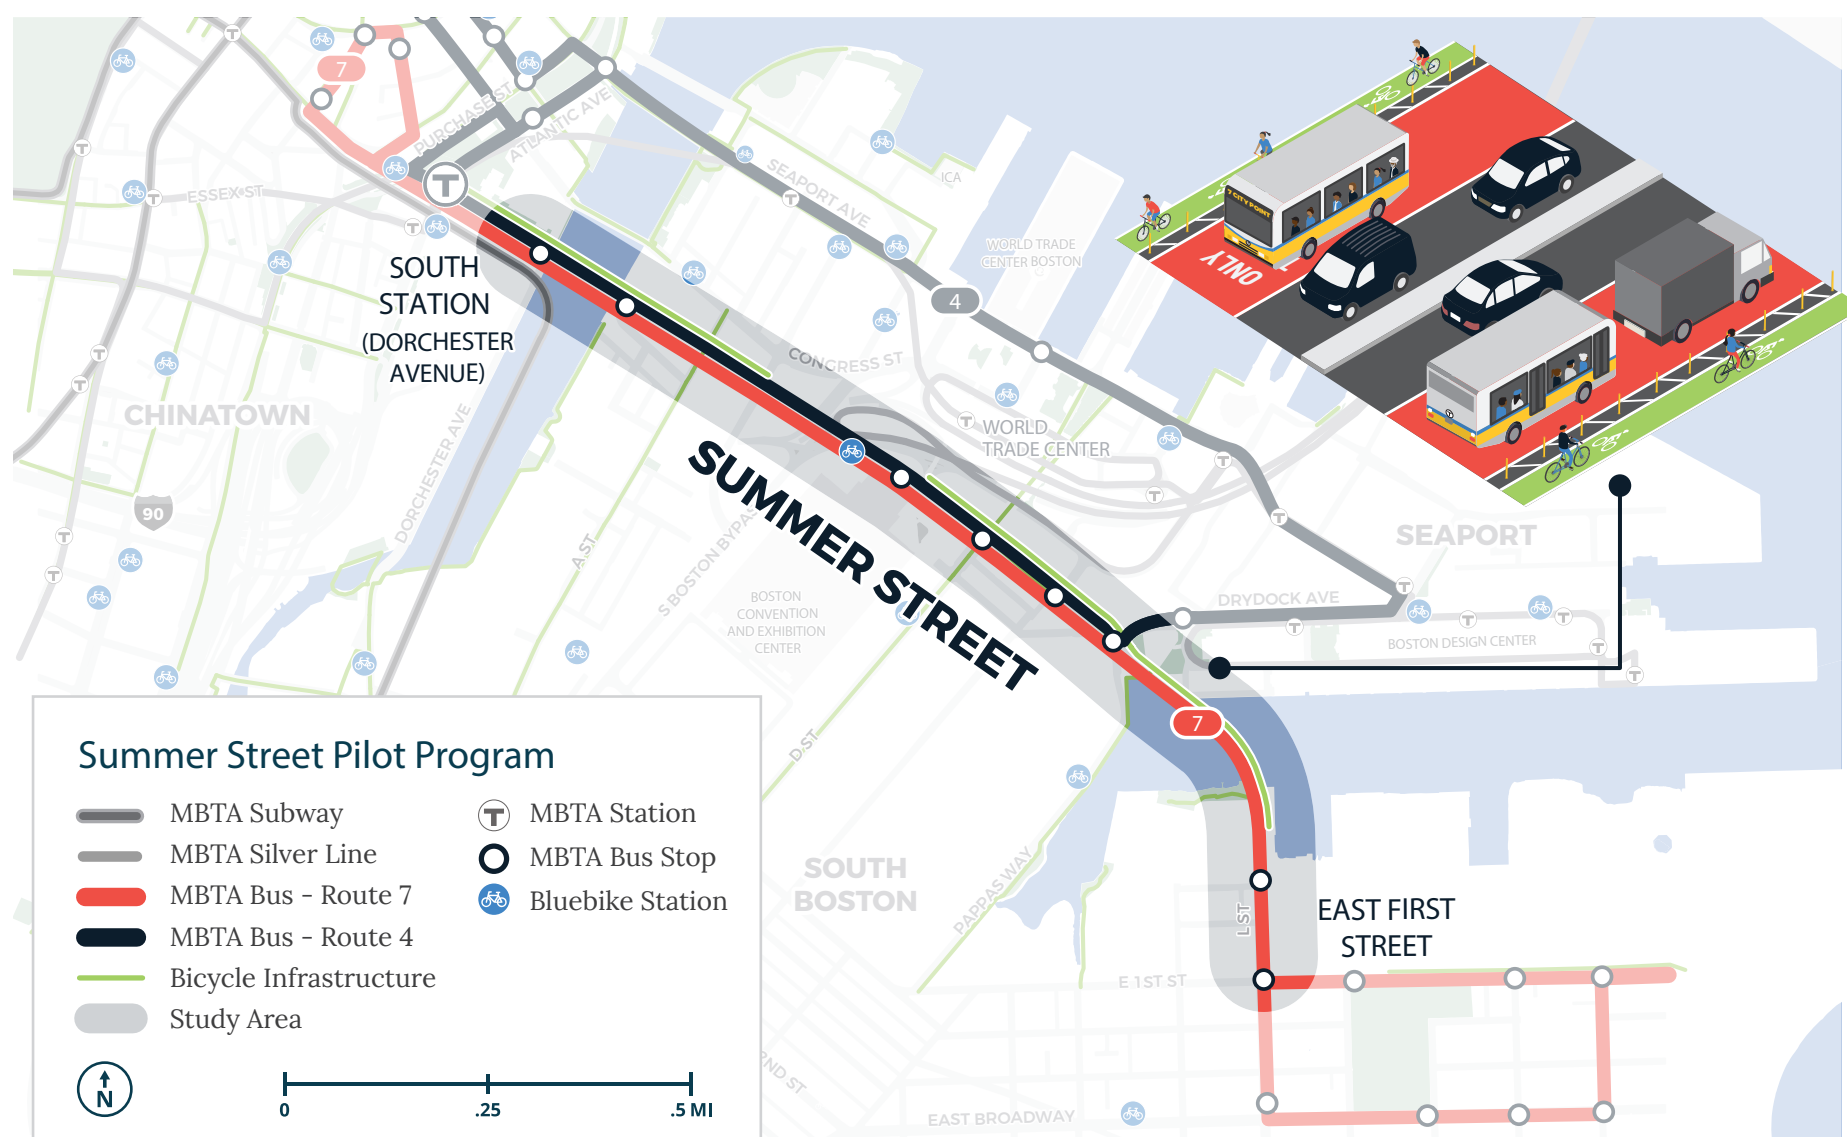

## WHERE?

Between South Station and East First Street

## WHEN?

September 2023

## WHAT DOES THIS BUS/TRUCK LANE MEAN FOR YOU?

### FOR BUS RIDERS

We expect a **reduction in travel time**, saving you time during rush-hour.

### FOR BICYCLISTS

The bus/truck lane will **provide separation** between people who bike and general traffic.

### FOR DRIVERS

We expect **travel times will change for drivers**. However, after a period of adjustment, we will measure the impact to understand the cumulative effect.

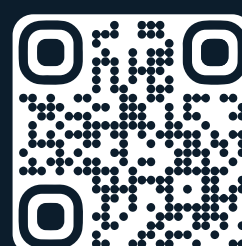

## HOW WILL THIS BE IMPLEMENTED?

- ✓ BTD will install the bus/truck lane using durable yet easily removable materials to implement rapidly.
- ✓ BTD, BPD, and BCEC will work together to enforce the bus/truck lane.
- ✓ The City will use traffic, ridership, speed, congestion data, and community feedback to evaluate the success of the pilot.
