

Columbia Road Community Advisory Team

The third Community Advisory Team (CAT) meeting took place on Wednesday, August 14, from 6:00 to 7:30 PM.

During the meeting, the project team shared a comprehensive overview of demographic and street safety data that had been collected over the past several months. This data included critical insights on crash rates, driving speeds, and car and foot traffic along Columbia Road.

The demographic data presented focused on key indicators such as residents' race and ethnicity, age distribution, and household income. This information will help ensure the plan addresses the needs of all community members, particularly the most vulnerable populations.

In addition to the data presentation, CAT members participated in an open discussion, providing valuable feedback and insights. This input will guide the project's next steps, ensuring that the voices of those who live, work, and travel along Columbia Road are at the forefront of the planning process.

Looking ahead, the project team will continue to refine the data analysis and integrate community input as the project progresses.
