NEIGHBORHOOD SITES COVID-19 LEVEL & TRENDS

| Level | Neighborhood/Site | Trend |
|----------|---------------------------------|------------------|
| Moderate | Allston/Brighton (A/B) | ↑ Large Increase |
| Low | Mattapan (MT) | ↗ Increase |
| | Roxbury (RX) | → Stable |
| | Hyde Park (HP) | → Stable |
| | Roslindale/West Roxbury (RS/WR) | → Stable |
| | Jamaica Plain (JP) | → Stable |
| | Dorchester (DOR 2224) | ↘ Decrease |
| Very Low | East Boston (EB) | → Stable |
| | Charlestown (CH) | → Stable |
| | Back Bay (BB) | ↘ Decrease |

BPHC Trend Overview by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line and dark blue text box in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

The vertical red line marks the date of August 1, 2024, when the laboratory that tests Boston's wastewater changed.

To see details and interpretation of these results for an individual neighborhood see [Results by Neighborhood](#).

Results by Neighborhood

- Allston-Brighton (A/B)
- Back Bay (BB)
- Charlestown (CH)
- Dorchester (DOR)
- East Boston (EB)
- Hyde Park (HP)
- Jamaica Plain (JP)
- Mattapan (MT)
- Roslindale/West Roxbury (RS/WR)
- Roxbury (RX)

Allston/Brighton

Level: **Moderate**

- Average value in **A/B** over the past week: **201** copies/mL.
- This value is **moderate** compared to past values and **higher** than the citywide average (**49** copies/mL).

Trend: **↑ Large Increase**

- Over the past two weeks, values in **A/B** are **increasing**.
- Change compared to two weeks ago: **+200** copies/mL (+19,951%).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (A/B);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Back Bay

Level: **Very Low**

- Average value in **BB** over the past week: **3** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **Decrease**

- Over the past two weeks, values in **BB** are **decreasing**.
- Change compared to two weeks ago: **-50** copies/mL (**-94%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (BB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Charlestown

Level: **Very Low**

- Average value in **CH** over the past week: **4** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **CH** are **stable**.
- Change compared to two weeks ago: **+3** copies/mL (**+253%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (CH);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Dorchester

Level: **Very Low**

- Average value in **DOR 2224** over the past week: **31** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **Decrease**

- Over the past two weeks, values in **DOR 2224** are **decreasing**.
- Change compared to two weeks ago: **-80** copies/mL (**-72%**).

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

East Boston

Level: **Very Low**

- Average value in **EB** over the past week: **10** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **EB** are **stable**.
- Change compared to two weeks ago: **+2** copies/mL (**+29%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (EB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Hyde Park

Level: **Very Low**

- Average value in **HP** over the past week: **50** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: → **Stable**

- Over the past two weeks, values in **HP** are **stable**.
- Change compared to two weeks ago: **+37** copies/mL (**+282%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (HP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Jamaica Plain

Level: **Very Low**

- Average value in **JP** over the past week: **36** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **JP** are **stable**.
- Change compared to two weeks ago: **+6** copies/mL (**+19%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (JP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Mattapan

Level: **Low**

- Average value in **MT** over the past week: **85** copies/mL.
- This value is **low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **MT** are **increasing**.
- Change compared to two weeks ago: **+78** copies/mL (**+1,067%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (MT);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Roslindale/West Roxbury

Level: **Very Low**

- Average value in **RS/WR** over the past week: **47** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **RS/WR** are **stable**.
- Change compared to two weeks ago: **+37** copies/mL (**+340%**).

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (RS/WR);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Level: **Very Low**

- Average value in **RX** over the past week: **66** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**49** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **RX** are **stable**.
- Change compared to two weeks ago: **-26** copies/mL (**-28%**).

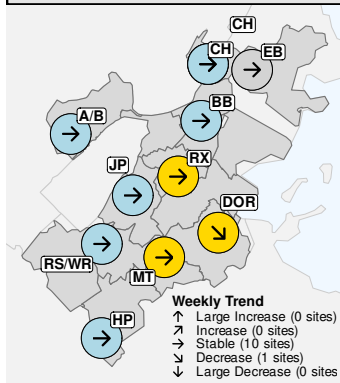

Updated: 02-Feb-2026 | Samples through: 28-Jan-2026 (RX);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Influenza Detections in Wastewater

**Influenza Wastewater Viral Activity Levels
& Trends
(28-Jan-2026)**

Flu Viral Activity Level Very High High Moderate Low Not Detected

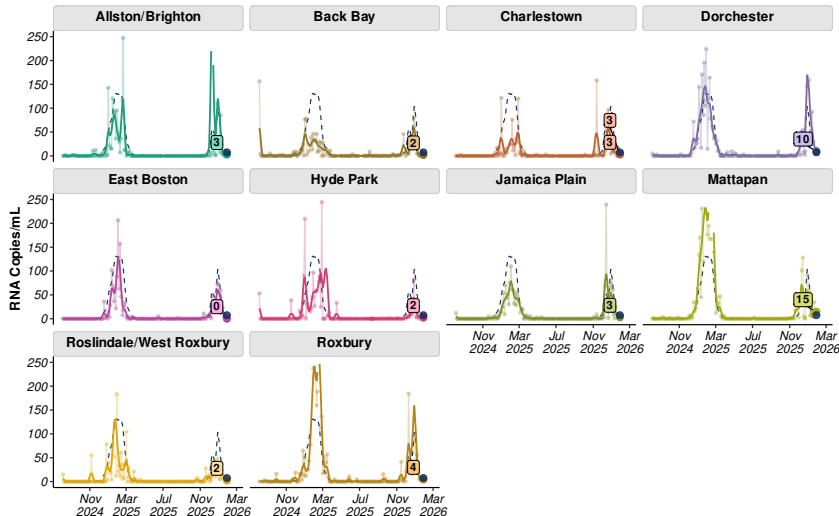

This map depicts the number of times influenza virus was detected in wastewater at the 3 most-recent samples (approximately the past week) at each of the neighborhood sampling locations.

Influenza Trends in Wastewater by Neighborhood

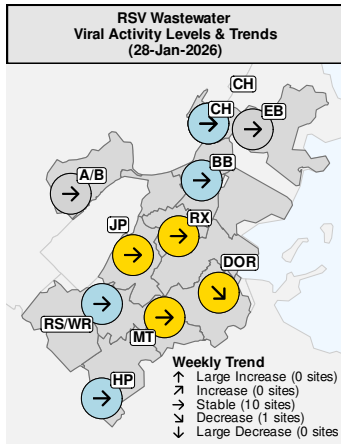

Influenza Trends in Wastewater

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

RSV Detections in Wastewater

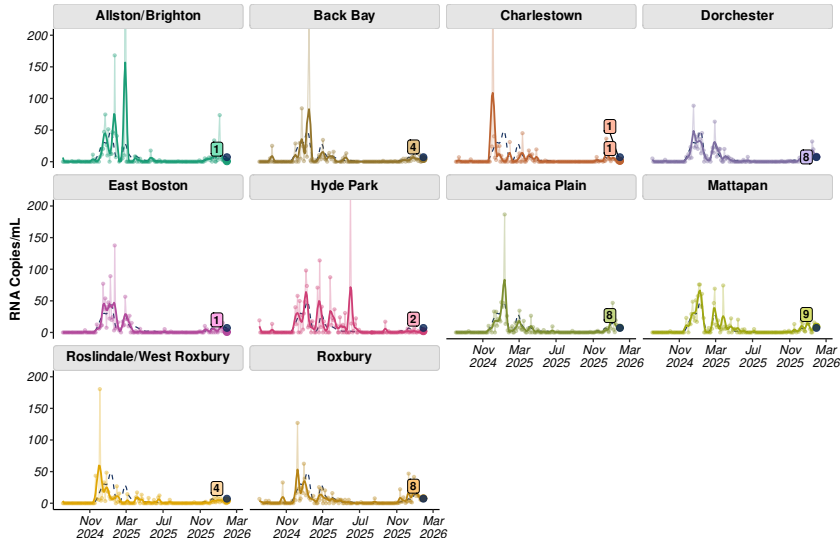

RSV = Respiratory Syncytial Virus

This map depicts the number of times RSV was detected in wastewater at the 3 most-recent samples (approximately the past week) at each of the neighborhood sampling locations.

RSV Trends in Wastewater by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

COVID-19 Wastewater Level and Trend Category Definitions

Concentration Levels

| Concentration Level | Concentration Value (Copies/mL) |
|---------------------|---------------------------------|
| Very High | >320 |
| High | 240-320 |
| Moderate | 160-240 |
| Low | 80-160 |
| Very Low | ≤80 |

2-Week Trend Categories

| Trend Category | | Trend Value (Copies/mL) |
|----------------|----------------|-------------------------|
| ↑ | Large Increase | >+175 |
| ↗ | Increase | +50 to +175 |
| → | Stable | -50 to +50 |
| ↘ | Decrease | -175 to -50 |
| ↓ | Large Decrease | ≤-175 |

Wastewater viral levels in your neighborhood indicate **very high risk** of COVID-19 infection.

Based on this level, BPHC urgently recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you are at [high risk of getting very sick](#), consider limiting non-essential indoor activities in large groups or in public where you could be exposed.
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Improve [indoor airflow and ventilation](#)
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Wastewater viral levels in your neighborhood indicate **high risk** of COVID-19 infection.

Based on this level, BPHC strongly recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Improve [indoor airflow and ventilation](#)
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Level: Moderate

Wastewater viral levels in your neighborhood indicate **moderate risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- If you are at [high risk of getting very sick](#), wear a [high-quality mask or respirator](#) in public indoor spaces
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Improve [indoor airflow and ventilation](#)
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Wastewater viral levels in your neighborhood indicate **low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Improve [indoor airflow and ventilation](#)
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Level: **Very Low**

Wastewater viral levels in your neighborhood indicate **very low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Improve [indoor airflow and ventilation](#)
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)
