- Recommendations and Resources by Level

Level: **Very High**

Level: **High**

Level: **Moderate**

Level: **Low**

Level: **Very Low**

Neighborhood Levels and Trends

COVID-19 Wastewater Levels & Trends (23-Sep-2026)

BOSTON CITYWIDE COVID-19 LEVEL & TRENDS

COVID-19 LEVEL

Low

112 copies/mL
samples through 23-Sep-2026

2-WEEK TRENDS

Increase
+76 copies/mL (+208%)

NEIGHBORHOOD SITES COVID-19 LEVEL & TRENDS

Level	Neighborhood/Site	Trend
Very High	East Boston (EB)	↑ Large Increase
Moderate	Roxbury (RX)	↑ Large Increase
	Hyde Park (HP)	↑ Large Increase
Low	Dorchester (DOR 2224)	↗ Increase
	Mattapan (MT)	→ Stable
	Back Bay (BB)	↗ Increase
Very Low	Jamaica Plain (JP)	→ Stable
	Roslindale/West Roxbury (RS/WR)	→ Stable
	Allston/Brighton (A/B)	→ Stable
	Charlestown (CH)	→ Stable

Increasing

+208%
over the past 14 days

BPHC Trend Overview by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line and dark blue textbox in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

The vertical red line marks the date of July 1, 2025, when the laboratory that tests Boston's wastewater changed.

To see details and interpretation of these results for an individual neighborhood see [Results by Neighborhood](#).

Results by Neighborhood

- Allston-Brighton (A/B)
- Back Bay (BB)
- Charlestown (CH)
- Dorchester (DOR)
- East Boston (EB)
- Hyde Park (HP)
- Jamaica Plain (JP)
- Mattapan (MT)
- Roslindale/West Roxbury (RS/WR)
- Roxbury (RX)

Allston/Brighton

Level: **Very Low**

- Average value in A/B over the past week: **22** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in A/B are **stable**.
- Change compared to two weeks ago: **+3** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (A/B);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Back Bay

Level: **Very Low**

- Average value in **BB** over the past week: **66** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **BB** are **increasing**.
- Change compared to two weeks ago: **+50** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (BB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Charlestown

Level: **Very Low**

- Average value in **CH** over the past week: **16** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **CH** are **stable**.
- Change compared to two weeks ago: **+15** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (CH);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Dorchester

Level: **Low**

- Average value in **DOR 2224** over the past week: **129** copies/mL.
- This value is **low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **↗ Increase**

- Over the past two weeks, values in **DOR 2224** are **increasing**.
- Change compared to two weeks ago: **+89** copies/mL (**+224%**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (DOR 2224);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

East Boston

Level: **Very High**

- Average value in **EB** over the past week: **663** copies/mL.
- This value is **very high** compared to past values and **higher** than the citywide average (**112** copies/mL).

Trend: **↑ Large Increase**

- Over the past two weeks, values in **EB** are **increasing**.
- Change compared to two weeks ago: **+662** copies/mL (**+66,184%**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (EB);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Hyde Park

Level: **Moderate**

- Average value in **HP** over the past week: **209** copies/mL.
- This value is **moderate** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **↑ Large Increase**

- Over the past two weeks, values in **HP** are **increasing**.
- Change compared to two weeks ago: **+187** copies/mL (**+846%**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (HP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Jamaica Plain

Level: **Very Low**

- Average value in **JP** over the past week: **44** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **JP** are **stable**.
- Change compared to two weeks ago: **-12** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (JP);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Mattapan

Level: **Very Low**

- Average value in **MT** over the past week: **72** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in **MT** are **stable**.
- Change compared to two weeks ago: **+25** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (MT);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Roslindale/West Roxbury

Level: **Very Low**

- Average value in RS/WR over the past week: **39** copies/mL.
- This value is **very low** compared to past values and **similar** than the citywide average (**112** copies/mL).

Trend: **→ Stable**

- Over the past two weeks, values in RS/WR are **stable**.
- Change compared to two weeks ago: **+38** copies/mL (**minimal change**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (RS/WR);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Level: **Moderate**

- Average value in **RX** over the past week: **237** copies/mL.
- This value is **moderate** compared to past values and **higher** than the citywide average (**112** copies/mL).

Trend: **↑ Large Increase**

- Over the past two weeks, values in **RX** are **increasing**.
- Change compared to two weeks ago: **+211** copies/mL (**+796%**).

Updated: 28-Sep-2026 | Samples through: 23-Sep-2026 (RX);

See [recommended actions and resources](#) based on levels and trends in this neighborhood.

Influenza Detections in Wastewater

Influenza Wastewater Viral Activity Levels & Trends (23-Sep-2026)

This map depicts the viral activity level of influenza at each of the neighborhood sampling locations.

Influenza Trends in Wastewater by Neighborhood

Influenza Trends in Wastewater

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

RSV Detections in Wastewater

RSV = Respiratory Syncytial Virus

This map depicts the viral activity level of RSV at each of the neighborhood sampling locations.

RSV Trends in Wastewater by Neighborhood

For each neighborhood, colored line and textbox shows the smoothed trend and most recent value in that neighborhood;

The dotted blue line in each panel shows the trend and most recent value across **all Boston sites** weighted by population.

COVID-19 Wastewater Level and Trend Category Definitions

Concentration Levels

Concentration Level	Concentration Value (Copies/mL)
Very High	>320
High	240-320
Moderate	160-240
Low	80-160
Very Low	≤80

2-Week Trend Categories

Trend Category		Trend Value (Copies/mL)
↑	Large Increase	>+175
↗	Increase	+50 to +175
→	Stable	-50 to +50
↘	Decrease	-175 to -50
↓	Large Decrease	≤-175

Wastewater viral levels in your neighborhood indicate **very high risk** of COVID-19 infection.

Based on this level, BPHC urgently recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you are at [high risk of getting very sick](#), consider limiting non-essential indoor activities in large groups or in public where you could be exposed.
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes
- NA

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Wastewater viral levels in your neighborhood indicate **high risk** of COVID-19 infection.

Based on this level, BPHC strongly recommends the following practices to prevent COVID-19 in your community:

- Wear a [high-quality mask or respirator](#)
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes
- NA

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Level: Moderate

Wastewater viral levels in your neighborhood indicate **moderate risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- If you are at [high risk of getting very sick](#), wear a [high-quality mask or respirator](#) in public indoor spaces
- If you have close contact with someone at [high risk of getting very sick](#), consider self-testing to detect infection before contact, and consider wearing a high-quality mask when indoors with them
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes
- NA

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Wastewater viral levels in your neighborhood indicate **low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes
- NA

RESOURCES

- Find a [vaccination clinic](#) in your neighborhood
- Call or visit the [Mayor's Health Line](#)
- [Learn more](#) about respiratory illnesses like [COVID-19](#), [the flu](#), and [RSV](#)

Wastewater viral levels in your neighborhood indicate **very low risk** of COVID-19 infection.

Based on this level, BPHC recommends the following practices to prevent COVID-19 in your community:

- **Continue to monitor wastewater levels and trends**
- Stay up-to-date on [vaccinations](#).
- Seek testing and possible treatment if you get sick
- [Stay home when you are sick](#) and avoid contact with others who are sick
- Regularly clean and disinfect frequently touched surfaces
- Wash your hands often with soap and water for at least 20 seconds and cover coughs and sneezes
- NA
