

Boston Transportation Department

Typical Detail for Crosswalks with 24 inch Longitudinal Lines

Not to Conventional Scale

Notes:

- 1.) All crosswalks shall be installed to the width of ten feet (10'), unless indicated otherwise in writing.
- 2.) All twenty four inch (24") thermoplastic reflectorized pavement marking lines shall be applied in no more than two applications, no combinations of greater than two (i.e. three 8" lines) will be accepted.
- 3.) Layout of crosswalk installation shall be approved by a Boston Transportation Department Engineer prior to thermoplastic being applied.
- 4.) All crosswalks installed shall conform to all relevant provisions of the Massachusetts Highway Department "Standard Specifications for Highway and Bridges" dated 1995, Section 860 regarding Reflectorized Pavement Markings.
- 5.) Crosswalks with 24" Longitudinal Lines shall be installed at the direction of a Boston Transportation Department Engineer only.
