

Expanded Neighborhoods

“ I’d like to have this whole part of Boston developed with the focus on housing, retail, parkland, and connections through to Allston - and to get here by attractive walkways, safe bikeways, and convenient bus & train!

— Galen, Allston ”

IMAGINE
BOSTON 2030

Imagine if we could release development pressures on our neighborhoods by using nearby land as a “release valve” to support new residents, businesses, and amenities.

Rate this idea!

If Beacon Yards in Allston became a new center of jobs and housing, we could... (Check all that appeal to you)

- Create housing for residents with a variety of incomes
- Strengthen cross-town transit connections to other neighborhoods and job centers
- Create spaces where business, innovation, education, healthcare, and cultural organizations can grow
- Create signature open spaces (e.g. along the Charles River)
- Ensure new construction creates a model “carbon neutral climate ready” district through stormwater management, energy neutral construction, and resilient design
